Subject: Safety Action Plan - Municipal Meetings for Project Selection

CRCOG is working with a consultant team including FHI Studio, Toole Design, and CDM Smith to develop a Safety Action Plan, with funding received from a Safe Streets and Roads for All (SS4A) grant. The new Safety Action Plan will replace the current Regional Transportation Safety Plan (RTSP). The Safety Action Plan will be available as a reference document for CRCOG municipalities to apply for future grant funding, including Safe Streets and Roads for All implementation. The Safety Action Plan will be a tool used to help significantly reduce fatal and serious crashes, and work toward CRCOG's Vision Zero goal of zero fatal and serious injury roadway crashes by 2040.

The Project Team is developing a list of priority project locations. This is your opportunity to help define roadway safety priorities in your municipality for inclusion in the Safety Action Plan. Virtual meetings have been scheduled as shown on the following page. The meetings will include discussion of the crash analysis results as shown on High Injury and High Risk maps; and solicit input from municipal officials to identify and prioritize safety projects and strategies. Municipal crash analysis and maps (updated July 2025) are on CRCOG's website: <https://crocogct.gov/safety-action-plan/>

All municipalities have received emails from Toole Design, with Outlook invitations to meetings per the attached schedule. Please feel free to contact Roger Krahn, Principal Transportation Engineer (rkrahn@crocogct.gov, 860-724-4215) or Anaka Maher (amaher@crocogct.gov, 860-724-4219) with any questions about upcoming meetings or our Safety Action Plan process.
